2016

SOFT LAUNCH

by Tan Sri Lee Lam Thye
NIOSH Chairman

19th CONFERENCE AND EXHIBITION ON OCCUPATIONAL SAFETY & HEALTH

21st - 23rd August 2016 | www.myniosh.com

PUTRAJAYA INTERNATIONAL CONVENTION CENTRE (PICC)

“BRIDGING THE OSH GAP THROUGH A PREVENTION CULTURE”

Speech by NIOSH Chairman,
Tan Sri Datuk Seri Lee Lam Thye
For Conference and Exhibition on
Occupational Safety and Health (19th
COSH) 2016 Soft Launch

Date : 30 March 2016

Venue : Rafflesia Hall, NIOSH Bandar Baru Bangi

NIOSH's efforts in organising the annual Conference on Occupational Safety and Health (COSH) should be commended due to our initiative towards enhancing occupational safety and health awareness in Malaysia.

The theme for COSH 2016, "*Bridging the OSH Gap through a Prevention Culture*" calls for managements responsible for the safety and health at the workplace to change the attitude and perception of their employees on safety and health through OSH awareness programme, effective OSH management, OSH competency, and most important, accident prevention culture.

It is no longer adequate to merely provide work instructions to workers without supplementing them with appropriate skills and competency needed through education and training so that they would understand the rationale of minimising risks to their safety and health as well as meeting the industrial and OSHMS requirements.

In this regard, it is important for NIOSH, as an organisation entrusted to promote Occupational Safety and Health (OSH) in Malaysia, to provide a platform for employees, employers, academicians, OSH practitioners, industries and participants to present and share their views and ideas on a wide range of OSH issues.

COSH 2016 would indeed be another ideal forum to contribute to further enhancement of OSH. It is the best avenue for those who are striving to upgrade the health and safety standards in their respective companies and organisations, raise their OSH concerns and cooperate in formulating the best solutions and strategies to address those concerns.

Ultimately, this will lead to improvements in safety management systems in the workplace, enhancement of safety standards in the country and in the long run, it will lead to increased productivity and profitability.

There is no fast track in the practice of safety and health in the industry. Therefore, it is crucial to ensure that employers and employees are able to close the OSH gap through information, education and training so that they know best how to protect themselves.

Increasingly, the promotion of safer conditions in the workplace is based on promoting a culture of risk and accident prevention that can improve the health of workers and the productivity of the enterprise.

The overall responsibility for providing a safe and healthy working environment rests with the employers who should demonstrate their commitment to OSH.

This can be done by building and maintaining a preventive safety and health culture that addresses the principles of prevention, hazard identification, risk assessment and control, information and training.

Workers, on the other hand, have a duty to cooperate with their employers in implementing OSH programmes.

They should observe and adhere to the procedures and other instructions designed to protect them and others present at the workplace from exposure to occupational hazards.

All work-related accidents and ill-health can be prevented if there is adequate foresight, planning, organisation and commitment to identify where the hazards are, assess the risks and take action before an accident happens or an illness is contracted.

Preserving human health is the key objective of social security. Promoting and creating a safety and health culture can save lives and reduce costs to society.

It is high time for employers and employees to be fully committed to workplace safety. The government, employers and employees must be committed to achieving a work culture that ensures safety and health. It must be emphasised that there should be no compromise on safety and health at the workplace.

Ultimately, when OSH is integrated into the organisational culture and becomes a core value, involvement and commitment from top management down to the rank-and-file employees can be further reinforced.

We need to emphasise effective leadership to produce better OSH management, increased productivity and enhanced performance.

The culture of an organisation dictates employee behaviour. Thus, the culture determines whether or not any safety programmes will be effective.

However, culture is not established by written policies but through effective leadership, day-to-day actions and decisions as well as the system in place that will ensure OSH is practised by managers, supervisors and work teams.

Leadership, through actions, systems, measures and rewards determine whether or not safety will be achieved in the organisation.

Leading effectively means knowing how to inspire people to channel their energies towards adopting OSH best practices. The quality of leadership shown by the management is vital in developing high standards of health and safety practices.

Lastly, I would like to thank all those involved in making this annual event a success. Let us all dedicate ourselves to creating and promoting a safety culture at work.

On this note, it is my pleasure to launch COSH 2016 Theme and Logo, entitled "BRIDGING THE OSH GAP THROUGH A PREVENTION CULTURE".

Thank you.

TAN SRI LEE LAM THYE
Chairman, NIOSH Malaysia

Memorandum Persefahaman (MOU) antara NIOSH dan Sabah Port Sdn. Bhd.

Majlis Menandatangani Memorandum Persefahaman (MOU) antara Sabah Port dan NIOSH telah dijalankan di Sabah Port Sdn Bhd pada 31 Mac 2016. MOU ini merupakan kerjasama antara NIOSH dan pihak Sabah Port Sdn Bhd dalam program NIOSH Safety Passport (NPtSP) yang dimeterai selama 3 tahun.

Majlis tersebut telah dihadiri oleh Pengarah Eksekutif NIOSH, Tuan Haji Zahrim Osman dan Pengurus NIOSH Sabah iaitu Encik Mohd Hussin Abd. Salam. MOU tersebut ditandatangani oleh Tuan pengarah NIOSH dan Mohd Sahid Haji Nawab Khan, Ketua Pegawai Operasi Sabah Port Sdn. Bhd.

Diharap dengan termeterai perjanjian tersebut projek ini dapat dijalankan dengan jayanya bagi membantu industri-industri di Malaysia khususnya di sektor perkapalan memahami dengan lebih mendalam isu keselamatan dan kesihatan pekerjaan dan membantu membangunkan garis panduan KKP di sektor ini.

Lawatan Delegasi daripada Sudan

Pada 2 Mac 2016, NIOSH telah menerima lawatan kerja rasmi daripada Delegasi Kementerian Pembangunan Insan & Buruh, Kerajaan Negeri Khartoum, Sudan melalui Universiti Teknologi Malaysia Razak School Kuala Lumpur (UTMRSKL). Delegasi tersebut terdiri dari 4 orang pegawai iaitu:

1. **H.E. Mr Osama Hassona Ahmad**
(Menteri Pembangunan & Buruh
Kerajaan Negeri Khartoum)
2. **Mr. Mohamed Mustafa Gasim Allah Alamin**
(Ketua Setiausaha, Kerajaan Negeri
Khartoum)
3. **Ms. Asma Hassan Osman**
(Pengurus)
4. **Mr. Ali Omer Eissa**
(Pengurus)

Tujuan lawatan ini adalah bagi mempelajari dan mengetahui dengan lebih dekat pelaksanaan dasar KKP yang diperaktikkan oleh NIOSH. Delegasi ini tiba di NIOSH pada jam 10.00 pagi dan disambut oleh barisan pengurusan tertinggi NIOSH. Ucapan aluan diberikan oleh Pengarah Eksekutif NIOSH Tuan Haji Zahrim Osman. Delegasi ini diberi taklimat ringkas mengenai aktiviti, peranan dan tanggungjawab NIOSH sebagai sebuah badan yang menjalankan aktiviti latihan, perundingan, penyelidikan dan penyebaran maklumat bagi aspek Keselamatan dan Kesihatan Pekerjaan.

Delegasi ini dibawa meninjau dan melihat secara dekat aktiviti yang dijalankan oleh NIOSH, seperti Pusat Simulasi Ruang

Kunjungan Hormat Pasukan Puspanita Cawangan Kementerian Sumber Manusia (KSM) ke NIOSH

Pada 3 Mac 2016, NIOSH menerima kunjungan hormat daripada Puspanita Cawangan Kementerian Sumber Manusia (KSM). Kunjungan tersebut terdiri daripada Y. Bhg Datin Seri Hjh Fatimah binti Hj Kassim, Penaung Puspanita Cawangan KSM, YBhg Datin Sri Pengerusi Puspanita Cawangan KSM bersama-sama Ahli Jawatankuasa Induk dan ahli-ahli Puspanita Cawangan KSM. Seramai lebih kurang 150 orang ahli Puspanita Cawangan KSM telah menghadiri majlis tersebut.

Majlis tersebut telah berlangsung di Dewan Cempaka, Menara NIOSH Bandar Baru Bangi dengan begitu meriah sekali. Ketibaan Pengerusi dan Ahli-ahli Puspanita Cawangan KSM pada petang itu disambut dengan penuh gilang-gemilang. Turut hadir ialah Pengarah Eksekutif NIOSH, Tuan Haji Zahrim Osman dan Isteri Puan Eliza Basa, Setiausaha Eksekutif NIOSH, En Ayop Salleh dan isteri, pengurus-pengurus dan Ahli Puspanita NIOSH. Majlis dimulakan dengan taklimat keselamatan dari wakil NIOSH, bacaan doa dan ucapan dari Y.Bhg Datin Sri Pengerusi Puspanita Cawangan KSM. Jamuan ringan (Hi-Tea) Jasamu Dikenang telah dimeriahkan dengan persembahan tarian, nyanyian, tarian poco-poco dan cabutan bertuah dan acara sampingan. Majlis tersebut bersurai pada jam 5.30 petang.

Terkurung, Klinik Kesihatan Pekerjaan dan Makmal-makmal NIOSH. Diharap dengan lawatan yang singkat ini, NIOSH akan dapat menjalankan hubungan kerjasama dengan negara-negara luar di dalam bidang Keselamatan dan Kesihatan Pekerjaan (KKP) di masa akan datang.

◀ Georgetown

Dua buruh Bangunan Didesah parap selepas dihempap runtuhan lantai konkrit bangunan kilang enam tingkat yang masih dalam pembinaan di Bayan Lepas di sini, semalam.

Kedua-dua mangsa cedera di kepala, belakang badan, patah kaki serta ta-

ngan. Seorang rakan mereka cedera ringan dalam kejadian kira-kira 3 petang itu.

Mangsa berusia 30-an yang berada di tingkat satuh, tidak sempat menyelamatkan diri ketika lantai seberat 400 tan itu runtuh.

Semua mangsa dikehari ke Hospital Pulau Pinang (HPP) untuk rawatan dan keadaan mereka dipastorkan stabil.

Tak dapat tumpung berat rangka konkrit Timbalan Pengarah Jabatan Bomba dan Penyelamat negara, Mohamad Shokik Hamzah, berkata siasatan awal mendapati beberapa struktur lantai berkenaan tidak dapat menampung berat rangka konkrit sehingga menghabiskan berlaku runtuhnya.

"Pemeriksaan mendapati runtuhnya itu berlaku di sini, semalam. Kedua-dua mangsa cedera di kepala, belakang badan, patah kaki serta ta-

tingkat dua bangunan berkenaan sebelum menghimpit tiga pekerja Banglades," katanya di sini.

Shokik berkata, kesemua mangsa yang berada di tingkat satuh mengenal pasti punca kejadian dan kerja pembinaan menghalang semata-mata bagi memudahkan bomba menjalankan siar-saturnya.

Sementara saksi, Jahagir Hassan, 30, berkata dia terdengar bunyi hentakan kubur-bebur pada sebahagian struktur lantai bangunan di tingkat dua runtuh dan menghempap ranakannya.

dia yang berada di tingkat satuh kemudian terde ngar bunyi runtuh dan jeritan pekerja lain yang meminti mereka melarikan diri.

"Sebaik mendengar jeritan rakan, saya terus berlindung dan melarikan diri," katanya.

"Kami menerima panggilan kecemasan membabitkan mangsa seorang lelaki berusia 28 tahun yang cedera di kaki akibat dilanggar sebuah forklif"

ISU PENGGUNAAN SIJIL KOMPETENSI PALSU

MYKKP rekod status pengendali kren

» JKKP dalam peringkat akhir bangun bank data untuk semak dokumen sah

Oleh Wan Noor Hayati Wan Alias
wan@bh.com.my

◀ Kuala Lumpur

Jabatan Keselamatan dan Kelebihan Pekerjaan (JKKP) dalam peringkat akhir membangunkan bank data yang merekodkan pengendali kren warga asing untuk mempunyai sijil kompetensi sah.

Menerusi bank data itu yang dinamakan Sistem Aplikasi Dalam Talian MYKKP, syarikat kontraktor yang mahu mengmuatkan khidmat pengendali kren boleh membuat keputusan dalam berkenaan secara dalam talian.

Pengaruh Bahagian Keselamatan Industri Ibu Pejabat JKJP Malaysia, Ibrahim Md Dol berkata sistem ditujukan dapat digunakan sepenuhnya pada April ini.

Katanya, sistem berkenaan dijangka mengatasi isu penggunaan khidmat warga asing atau tempatan yang menggunakan sijil kompetensi palsu bagi mengendalikan semua jenis kren di tapak.

Ia membebaskan sistem bersepadu bagi memantau secara sistematis yang dibangunkan me-

MYKKP dijangka dapat membantu mengendali kren jenis menara, beroda dan berentasi di tapak binaan secara tidak sotuh.

(Foto: ASYRAF HAMZAH/BH)

rangkumi pendaftran dalam talian mengikut spesifikasi sebarang pengendali perancangan dan operasi kren menara, beroda dan berentasi.

Isu dihadapi berlaku dengan pendaftran dan pembaharuan sijil pegawai keselamatan dan kesihatan pekerjaan, penyelia keselamatan dan pengetahuan teknikal dan penyejahteraan.

Boleh diguna secara meluas

"JKKP berharap sistem ini jika sudah mantap sepenuhnya boleh digunakan oleh semua lapisan rakyat secara meluas. Saya yakin

menyemak kompetensi pengendali kren."

Malah, katanya, sijil kompetensi yang dipaparkan boleh dimuat turut.

"Modul MYKKP pada peringkat ibu pejabat sudah dilaksanakan, manakala pada peringkat negeri sistemnya sedang diuji."

Georgetown

Perketat SOP di tapak binaan elak kemalangan

Prosedur Operasi Standard (SOP) di kawasan tapak pembinaan perlu diperketatkan bagi mengelak kemalangan yang kerap dilaporkan berlaku dalam kalangan pekerja ketika ini.

Presiden Persatuan Pengguna Pulau Pulau Pinang (CAP) SM Mohamed Idris berkata, laporan Kementerian Sumber Manusia tahun lalu mendedahkan 92.5 peratus tapak pembinaan didapati tidak mematuhi spesifikasi ditetapkan Jabatan

Kesihatan dan Keselamatan Pekerjaan (DOSH).

Beliau berkata, 1,200 pekerja didapati terabit dalam kemalangan yang menyebabkan mereka mengalami kecacatan fizikal akibat kemalangan dalam tempoh sama.

"Keadaan ini berlaku berikutan pekerja tapak pembinaan mengambil mudah notis keselamatan dan tidak mematuhi undang-undang sedia ada kerana tiada langkah penguatkuasaan dibuat.

"Oleh itu, menjadi

tanggungjawab syarikat pembinaan mematuhi syara DOSH dan memastikan pekerja menggunakan peralatan keselamatan disediakan bagi mengelak risiko kemalangan," katanya, di sini, semalam.

Mohamed Idris berkata, berikutan itu, DOSH perlu melakukan pemantauan berterusan di tapak pembinaan dan mengelak daripada memberi alasan jabatan itu tidak mempunyai pegawai yang cukup.

OSH IN SCHOOLS

Regular safety audits can reduce the accident rate in schools.

Importance of safety audits

A YEAR Two pupils from SRK Jasin in Malacca sustained injuries after the wall of the school building collapsed on her due to strong winds on Saturday. This shows the importance of regular safety audits to ensure that school buildings and their surroundings are safe.

Safety audits should be conducted on building structures and basic infrastructure in schools, such as classrooms, laboratories, canteen, toilets and playgrounds.

I would like to propose that schools, universities and higher education institutions conduct safety audits once in every two years to identify weaknesses.

INDIVIDUALS hold safety as a "value" and not a priority, because our priorities change on an hourly basis;

INDIVIDUALS

take responsibility for the safety of their co-workers in addition to themselves; and,

EMPLOYEES of all levels are willing and able to act on their sense of responsibility; they should go "beyond the call of duty".

The following are some requirements for any approach to safety and contributes to a total safety culture through a BBS approach:

A STRONG management commitment to maintaining and improving behavioural safety, witnessed in the regular acts of individuals at the management level.

RESPECTFUL, trusting, open communication between the management and employee groups about safety at the workplace.

AN OPEN, feedback culture among employees, which enables employees to consistently learn and grow.

COMMITMENT to improving the profile of and attitude to health and safety and increased employee engagement in safety.

AN EMPHASIS on safe and unsafe behaviour instead of depending on indicators such as safety statistics.

A STRONG, consistent and timely reaction to the discovery of unsafe acts, whether they result in injury or not.

TRANSPARENT and fair leadership from all, including managers, supervisors and owners.

BBS thus promotes awareness among all workers to consider in working towards an accident-free environment.

This is in line with the National Institute for Occupational Safety and Health's (NIOSH) goal to help organisations, including schools and universities to prioritise safety and embrace a safety culture.

We welcome the action taken by the Education Ministry, through district Education offices, to monitor and identify schools that need help to do rewiring or to repair building structures, including fences.

I am sure that the assurance given by the education minister that the government remains committed to providing assistance to schools in need, despite the global economic slowdown, is a relief to people, especially teachers and parents.

Statistics from the Department of

Occupational Safety and Health show that between 2012 and last year, there were 18 accidents and one fatality reported in schools while 10 accidents and one fatal accident occurred in institutions of higher learning.

Apart from the safety audit, schools also need to establish safety procedures for students and teachers, so that accidents can be avoided, and they can carry out activities in a safe environment.

For instance, safety procedures should be established for the classrooms, teachers' room, chemistry and physics laboratories, offices, canteen, school playgrounds, as well as safety procedures for electrical wiring.

As an organisation responsible for implementing activities related to occupational safety and health, or OSH, NIOSH feels committed to foster OSH culture in schools and educational institutions.

That is why NIOSH introduced the OSH In School programme to create awareness about safety and health in schools.

This is our corporate social responsibility project, which is implemented with sponsorship from corporate organisations.

Schools are a place of work. Teachers and school staff are the employees, while students, parents and visitors are people affected by the activities of employees in the workplace, as defined under the Occupational Safety and Health Act 1994.

IMPORTANCE OF SAFETY AUDITS

Publication: News Straits Times

Date of Publication: 1 March 2016

TAN SRI LEE LAM THYE,

Chairman, National Institute for Occupational Safety and Health

Use behaviour-based approach

Accidents caused by poor safety management at construction sites are serious and must be addressed.

take measures to prevent accidents. Those in positions of authority must pay heed to standards in relation to occupational safety and health.

Laws and regulations cannot automatically ensure health and safety practices at construction sites. What we need is the adoption and implementation of safety measures by safety-conscious contractors supported by experienced and trained employees.

BBS addresses factors of influence and reinforces learning and behaviours. It is linked to company culture and values and, most importantly, is an excellent tool to improve safety at the workplace.

Reports of falling cranes at construction sites resulting in the damage of homes and public property are matters of serious concern. Construction activities carried out without regard for the environment have resulted in environmental mishaps, such as floods and landslides.

Such accidents could affect the image of the company, delay construction and generate costs. In some cases, it can also cause injury to workers, which can demotivate and demoralise them.

The key findings of accident investigations highlight the need to review and enhance awareness and competency of parties involved in such incidents, particularly their roles and responsibilities in developing best practices related to workplace safety.

It is essential for those involved in the construction industry to be sensitive to such problems and

ity, social and moral obligation, good business sense and legal obligation.

BBS can help organisations achieve safety excellence through knowledge of actionable indicators that are statistically valid and reliable.

BBS provides line management the opportunity to prove and demonstrate strong commitment to the core values of their organisation. When used with the company's integrated safety management, BBS can impact injury rates and total reportable cases.

Employers must commit to and understand issues of occupational safety and health as it is part of corporate responsibility. This cannot be achieved without understanding and cooperation between employers and workers. Occupational safety and health neither discriminates between gender, appearance or citizenship.

Local and foreign workers are entitled to the same rights. Accidents neither distinguish between victims nor the value of the project.

We are the ones who can recognise hazards at the workplace and can take action to prevent accidents. Workers need to be protected from hazards and risks.
